DETAILED ACTION

Election/Restrictions

1. Claims 1-16, 39-43, and 58-63 have been canceled. Claims 17-38, 44-57 remain in prosecution.

Information Disclosure Statement

2. The IDS filed 11/28/2000 has been considered and recorded in the file.

Claim Objections

3. Claims 31-32 are objected to because of the following informalities: independent claim 25 directs to an apparatus of computer test station; while dependent claims 31 and 32 include "the steps of" in the preamble which corresponds to method claims. Therefore, the term "the steps of" in the preamble should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 37-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Rickli et al. (US 5,481,588).

Regarding claim 37, Rickli teaches a method for use in simultaneously testing a plurality of wireless telephone units operative for wireless communications, the method comprising: receiving first caller identification (ID) information associated with a first wireless unit (col. 7, line 17); performing a first test function during a first time period in connection with the first wireless unit and generating first test data therefrom (col. 7, lines 19-20, connection parameters); storing the first test data in association with the first caller ID information (col. 7, lines 13-14). It is noted that Rickli also teaches that the method also provides the same steps for a second wireless unit (arrangement for all the test mobile units 16, col. 7, lines 27-32).

Application/Control Number: 09/724,577

Art Unit: 2682

Regarding claim 38, Rickli also teaches that the first time period overlap with the second time period (see loading, col. 7, line 34).

Allowable Subject Matter

6. Claims 17-36, 44-57 are allowed.

Regarding independent claim 17, Rickli teaches testing the operation of a wireless unit by a computer which includes the steps of a telephone call from the wireless unit, receiving one or more parameters for execution and executing a predetermined test process. Rickli fails to teach receiving signals for selecting one of plurality of test functions and executing the test process corresponding to the selected test function using one or more parameter. Schillaci teaches that a wireless unit selects one or test functions and one or more parameters for executing a predetermined test processed (col. 3, lines 10-24). However, first, Schillaci teaches away from the claimed invention in that the test processed execution is performed at the wireless unit (col. 3, lines 25-30) rather than at the computer. Second, there is no suggestion to provide the selection of

Application/Control Number: 09/724,577

Art Unit: 2682

one of plurality of test functions of Schillaci to the testing of Rickli.

Therefore, the claim is allowable over the prior art of record.

Regarding independent claims 25 and 33, the claims are allowable for the same reason as set forth in claim 17.

Regarding independent claim 44, the prior art of record fails to teach the steps of repeating and storing as claimed.

Regarding independent claim 51, the prior art of record fails to teach the steps of repeating and storing as claimed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LEE NGUYEN whose telephone number is (703)-308-5249. The examiner can normally be reached on 8:00 AM - 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, VIVIAN CHIN can be reached on (703) 308-6739. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
